

### **Artist Statement**

This is my first-time using Autodesk Fusion and I have to say it's very interesting and I found it fun exploring the tools in order to make the stamp. Doing this for the first time, I followed the tutorial and had no troubles except I didn't know how to flip the svg file in Autodesk and was planning to go back to fix it, but I ran into more problems since I didn't understand how to edit it so I ended up redoing the whole thing once I figured it out. Overall, it was great and, in the future, I will learn how to edit my work after its finished without problems hopefully.
